# When do you use first aid kit ?

First aid is important for a number of situations that don't require a trip to the hospital or emergency room. These situations include minor falls, bee stings, burns, allergic reactions, and other common accidents. A first aid kit is helpful for these types of situations.

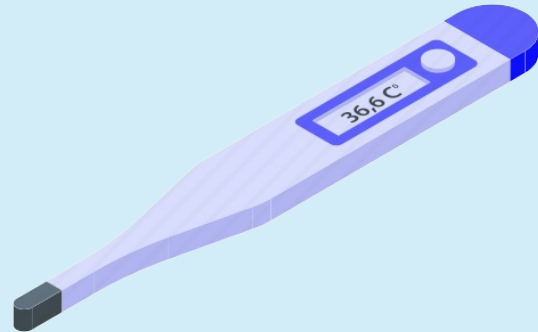

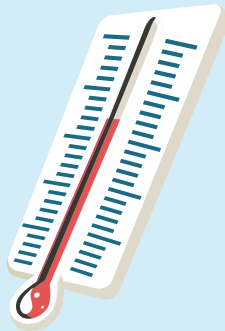

# Tweezer

- Tweezers are small hand tools used for take out too small things to be easily handled with the human fingers.
- You will take the tweezers close to the thing you need to pick out then you will carefully remove things you need to take it out it.

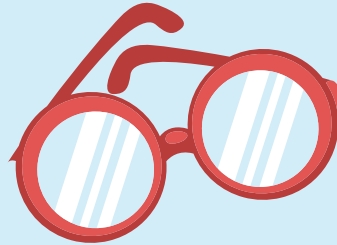

# Oral thermometer

- You need oral thermometer when we feel hot inside and you will take out oral thermometer to know your body temperature
- You will have to set the oral thermometer to zero, then put the oral thermometer in your mouth and wait for 3-4 minutes

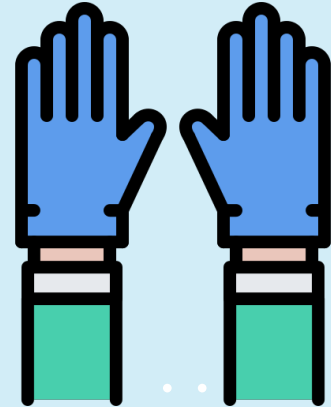

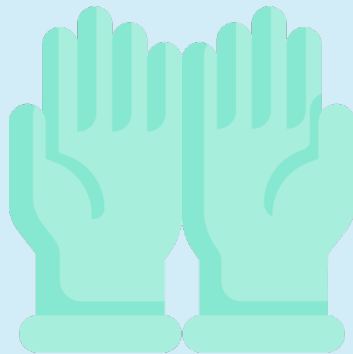

# Breathing barrier

- You need a breathing barrier when you can't breathe like normal, doctor will put oxygen in the breathing barrier so you can breathe more easy.
- When using the breathing barrier you must wear the breathing barrier and then say to the doctor to put the oxygen in the breathing barrier.

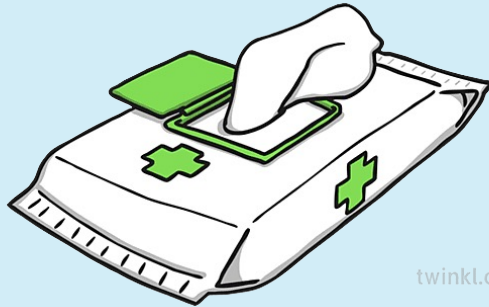

# Latex gloves

- When you touch in the parts are bleeding , you need to wear latex gloves
- Wear the latex gloves and then when we're done after that we need to do we have to take off the glove and throw it in the bin and washing our hands.

# Antiseptic and Antiseptic wipes

- When you have open wound in your body
- You will pour antiseptic on antiseptic wipes then touch the open wound

twinkl.com

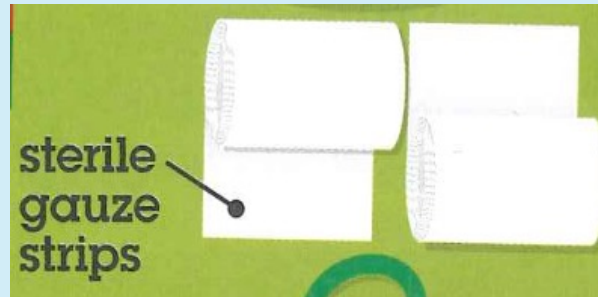

# Ice pack

- You will need ice pack when you get spains or burn,...
- You will put the ice pack in the fridge, next you put the ice pack on injury places

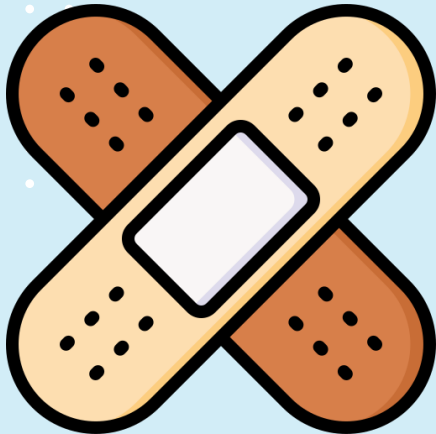

# Sterile gauze strips

- It can be used to clean cuts, scrapes, and burns, and also acts as a large bandage.
- You can make use of one or more sterile gauze pads. Apply the gauze pad directly to the open wound

# Band - Aid

- You will need the band - aid when you have cut or you have place are bleeding,....
- You will take the band - aid and stick on the place you have cut or bleeding.
